

**BASIC7<sup>®</sup> REFLEX WW: The right thermal screen for a new start**

The economic crisis, consequence of Covid-19 outbreak, leads to a changement of our priorities.

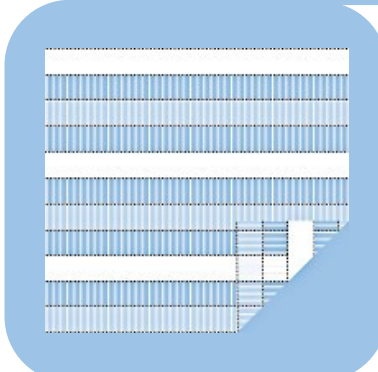

BASIC7 REFLEX WW is the thermal screen series developed to fit the actual economic situation:

- **7 years warranty**
- High performance over time
- Excellent value for money
- Extremely strong against aging and friction
- Knitted pattern
- Ideal and complete shading range for protected crops
- High diffusion of sunlight
- Particularly suitable for intense sunlight areas

Coherently with our production philosophy, BASIC7 REFLEX WW guarantees extra durability while keeping its performance intact over time, so that the grower can decide to replace the screen when it is convenient for him or when he considers it no longer efficient. But he is not forced to do this because the screen is not anymore usable (by aging and friction).

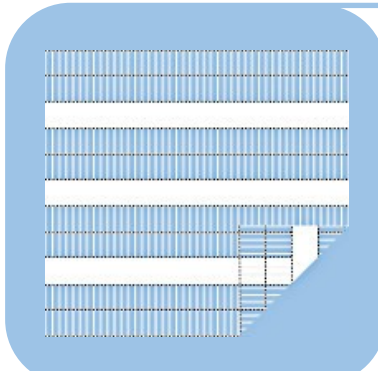

This is an open structure screen, **for indoor use**. The pattern and its strength have been tested over years of use in the greenhouse in a very sunny area, marking the correct way for this new proposal.

BASIC7 REFLEX WW is available in four options:

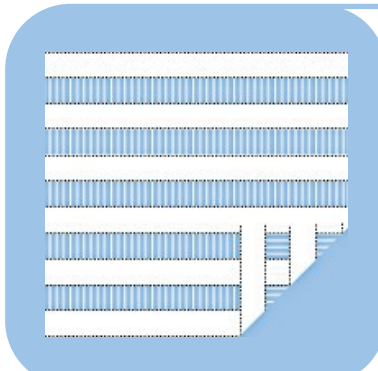

**BASIC7 REFLEX WW 25**

<b>Shading</b>	± 27%
<b>Pattern</b>	1 White 1 Open 1 Transparent 1 Open
<b>Weight</b>	± 140 g/m <sup>2</sup>
<b>FR version</b>	available

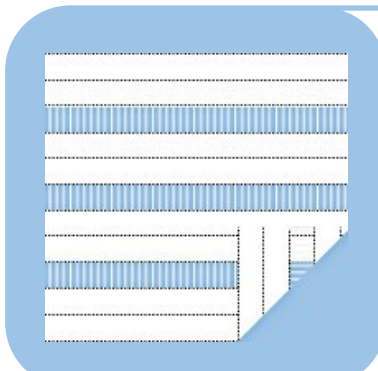

**BASIC7 REFLEX WW 35**

<b>Shading</b>	± 33%
<b>Pattern</b>	1 White 2 Open
<b>Weight</b>	± 135 g/m <sup>2</sup>
<b>FR version</b>	available

**BASIC7 REFLEX WW 45**

<b>Shading</b>	± 45%
<b>Pattern</b>	1 White 1 Open
<b>Weight</b>	± 145 g/m <sup>2</sup>
<b>FR version</b>	available

**BASIC7 REFLEX WW 55**

<b>Shading</b>	± 55%
<b>Pattern</b>	2 White 1 Open
<b>Weight</b>	± 155 g/m <sup>2</sup>
<b>FR version</b>	available
